Project Management: An approach for managers

One-day programme

Programme Aim:

Many managers try to manage projects relying primarily on their soft skills first and learning the science of project management as they go. Project Management is both a science AND an art. This course empowers managers with the tools of the most successful project managers in the world. Participants learn to harness the power of Earned Value Management to control any project. Managers from all organisations where improved project management is critical will find huge benefit in this programme.

Programme Outline:

- ❶ Fundamental project management skills, concepts and techniques
- ❷ Realistic, measurable, objective setting
- ❸ Project costs and schedules using simple, proven techniques
- ❹ Project control and monitoring system

Key Learning Outcomes:

Upon completion of this course, attendees will be able to:

- ❶ Focus on managing the constraints faced in any projects
- ❷ Utilise schedule compression: Crashing and Fast Tracking
- ❸ Define project scope and new techniques to control, track and monitor progress
- ❹ Use sophisticated tools to manage time and costs effectively

Who should attend:

- Any senior manager who handles projects
- Experienced managers who want fresh techniques
- Anyone who manages teams and virtual teams
- Those expected to do more, with less resources

Facilitator:

Farzin Hosseini, Chartered Engineer and a PMP chapter leader of PMI Educational foundation (PMIEF). As a programme and project manager he has worked internationally with virtual teams in Ireland, UK, Poland, Czech Republic, Slovakia, Romania and Middle East. He has been involved as a portfolio manager with ABM Europe to plan and implement Key Performance Index to improve the quality of project performance and deliverables. He is the founder of HB Agile Project Management Service (exclusive authorised trainer of RMC Project in Ireland) providing training for all RMC instructor led courses and project management related courses internationally.
