

A Lunchtime **SITE VISIT** to the
Foxes Den Water Treatment Plant, Sligo

Hosted by Celtic Anghian Water Ltd and Irish Water

Date: **Friday 3rd May 2019** Time: **1pm**

Address: Foxes Den WTP, Tonaphubhle, Sligo
Google Maps: <https://goo.gl/maps/tsTtEP4fuU72>
Coordinates: 54.255607, -8.454868
Journey: approx 10mins from Sligo Town Centre
Parking: available at the site

A €3 million upgrade and refurbishment of the Foxes Den Water Treatment Plant completed in 2017 aims to meet the current water demand in Sligo whilst also providing capacity to meet future development needs. The current Foxes Den Plant, which takes its raw water from Lough Gill, is now considered 'state of the art' and delivers approximately 11 million litres of drinking water per day to the Sligo area, at a quality that complies with national and European Drinking Water Regulations as well as Irish Water's own process and engineering standards. Here's your chance to see it all first hand...

This **lunchtime site visit** provides an excellent opportunity to visit this key piece of infrastructure, to hear from the operators of the plant, and to see the key stages of the water treatment process including pre-dosing, flocculation, clarification, filtration, fluoridation and chlorination.

Only **20 spaces are available**, so please contact Rowan (contact details below) to book your place. Further details will be issued once booking is confirmed. **Note all visitors must bring and wear their own PPE** (hard hats, safety boots, hi-vis vest and safety glasses) as this is the minimum requirement for IW sites.

Site Visit Itinerary:

1pm (sharp)	Arrival at Foxes Den WTP (light lunch provided by NW Region)
1pm – 1:15pm	Introduction and presentation
1:15 – 1:55pm	Guided tour of the site
2pm	Leave site
