Dispute resolution experience	I was persuaded of the merit of mediation as an effective, low cost dispute resolution method on a without prejudice basis through participation as a Party in a number of significant construction disputes. My career has always focused on preferring a negotiated, agreed settlement of disputes rather than expensive referral to legal and/or adjudicative processes with associated loss of control by the parties.
Specific areas of expertise	Building and Civil Engineering, Project Management, Professional Services, Industrial, Commercial, Real Estate and Property Matters.
